Dear Sir.

I have extensive knowledge of HTML, CSS, JavaScript, PHP(Laravel), MySql, and MERN stack. Combined with my communication and problem-solving skills, I think I would be an excellent candidate for the **Web Developer** role at your company.

My latest role as a Junior Full Stack Developer at Bagan Innovation Technology, I design, code, and implement website such as internal management system CMS, statistics system CMS, SMS-OTP management system CMS and API and maintaining CMS and API for mobile APP. Also, I have some other projects experience like portfolio, movies app, Blogs and E-commerce as a freelance project. In my latest project, I built small online book store for Pyinsagam book store, which helped increase their sales. I have developed strong communication and teamwork skill. I can bring my technical skills and passion for collaboration to your team.

I have always been passionate about web development. I am constantly seeking out new technologies and staying up-to-date on trends in the industry.

Thank you for taking the time to review my credentials and accomplishments. I am very passionate about being a competent and contributing team player, and I hope to have the opportunity to discuss my examples in greater detail with you. I look forward to answering your questions and learning more about this position and your development teams.

Yours sincerely

Aung Bhone Khant
